The 2020 metabolomics publication awards

Royston Goodacre[1]

Metabolomics is very proud to publish papers and reviews that are very well received by the community. Therefore, in order to appreciate the excellent research published in *Metabolomics* the following prizes are awarded to the most downloaded original articles and reviews published in the previous year:

- *Best Paper Award*—for the Original Article with the highest total number of downloads during the previous year. The first author of the winning paper receives a complimentary ebook from Springer (value 200€), a front cover image in the *Metabolomics* journal, and the paper will be made freely available for 30 days.

    The runner-up paper will also be made freely available for 30 days.

- *Best Review Award*—for the Review Article with the highest total number of downloads during the previous year. The first author of the winning paper receives complimentary e-books from Springer (value 200€), a front cover image in the *Metabolomics* journal, and the paper will be made freely available for 30 days.

    The runner-up review will also be made freely available for 30 days.

In order for a paper to be eligible for these awards it must be either a primary research paper (which may include best practice or standards articles, as well as letters and short communications) or a review article (which includes white papers) that was published in its final form in 2019. All awards will be based on popularity via downloads.

Congratulations to the following 2020 winners!!!
