

NEWS: The 2022 *Metabolomics* publication awards

© Springer Science+Business Media, LLC, part of Springer Nature 2022

Metabolomics publishes great papers and reviews and some of these are very well received by the metabolomics community. A few years ago we decide that it would be great to acknowledge these articles and thus *Metabolomics* presents the following awards to the most downloaded original primary research articles and reviews published in our journal the previous year:

- **Best Paper Award** is awarded to the Primary Research Article with the highest total number of downloads during the previous year. The first author of the winning paper receives a complimentary ebook from Springer (value 200€), and we highlight the work on the front cover of our *Metabolomics* journal. The paper will be made freely available for 30 days.
- **The runner-up paper** will also be made freely available for 30 days.
- **Best Review Award** is awarded to the Review Article with the highest total number of downloads during the previous year. The first author of the winning paper receives complimentary e-books from Springer (value 200€), we also highlight the review on the front cover of our *Metabolomics* journal. The review will also be made freely available for 30 days.
- **The runner-up review** will also be made freely available for 30 days.

For an article published in *Metabolomics* to be eligible for these awards it must be either a Primary Research Paper (this can include metabolomics standards and best practice articles, as well as short communications or letters) or a Review Article (these also include white papers) that was published in its final form in 2021.

Congratulations to the following 2021 winners!!!
